EXPERIENCE

Senior UX/UI Designer Tietoevry (UHG)

June 2024 — Present

Senior UX Designer working with a large U.S. healthcare provider on complex, regulated digital products for medical professionals.

- Conducted stakeholder interviews, documentation analysis, and group usability testing.
- Translated insights into clear onboarding flows and scalable interaction patterns.
- Owned the redesign of major healthcare hubs and landing pages, from structure, layout, and visual hierarchy to interaction patterns, across desktop and mobile.
- Simplified complex workflows across mobile and responsive platforms.
- Presented design concepts and communicated design rationale to product, business, and compliance stakeholders, driving alignment on key decisions.
- Partnered with developers throughout design and implementation, running design QA and implementation reviews to ensure design fidelity.
- Delivered developer-ready specifications, including annotations, spacing and typography scales, and component usage rules.

Freelance — Senior Product & UX/UI Designer Beett · Third Term · Miller Zell · DMO

May 2022 — Present

Senior Product & UX/UI Designer working with multiple companies across education, healthcare, wellness, and marketing on end-to-end digital products.

- Most recently, worked on a content-driven mobile app for marketing professionals, enabling teams to share articles, videos, and location-based recommendations through an interactive map.
- Designed corporate training experiences, leading the full ideation process from concept definition to storytelling and content structure.
- Created communication bots, user flows, and visual systems to improve digital interactions and overall usability.
- Contributed to health-related products, including a medical app and a migraine-treatment solution for large pharmaceutical companies.
- Supported consumer wellness branding and packaging design, ensuring clarity, consistency, and alignment with brand strategy.
- Designed and built responsive web experiences using HTML and CSS, including a personal portfolio site.

UX/UI Designer Galicia Bank

May 2022 — June 2024

UX/UI Designer within the Payments stream of a large-scale banking app, designing high-impact, transaction-critical experiences in a regulated environment.

- Designed core payment and transaction flows used at scale across B2C (online banking) and B2B (office banking) products, across native mobile apps, desktop, and responsive web.
- Worked extensively with a design system on incremental improvements and large-scale redesigns, including a major overhaul of the main user homepage, redefining layout, visual hierarchy, and typography for clearer financial information.
- Designed complex data-heavy dashboards with a strong focus on usability, hierarchy, and clarity of financial information.
- Analyzed user behavior with Hotjar to identify friction points, and authored UX briefs and user flows aligning product goals, user needs, and regulatory constraints.
- Led the UX design of a new banking product from scratch, including research, proto-persona definition, information architecture, UI design, high-fidelity prototyping, and usability testing.
- Presented solutions to product and business stakeholders, balancing usability with business and compliance requirements.
- Collaborated with engineering from discovery through release, reviewing implementations and documenting visual and interaction fixes before launch.
- Created detailed handoff documentation within the design system: annotations, design rules, component states, and typography and spacing guidelines.

Senior Product Designer Carestino

February 2021 — January 2022

Product Designer focused on adapting and localizing China-manufactured products for multiple Latin American markets, across physical and digital touchpoints.

- Led end-to-end product adaptations across multiple Latin American markets, applying cultural context, language nuances, and usage patterns to create usable, localized solutions.
- Worked across physical products and digital experiences, including feature design, supporting assets, and user-facing materials.
- Collaborated with cross-functional teams to balance global product foundations with local market requirements.
