— EXPERIENCE

Senior UX/UI Designer June 2024 — Present
Tietoevry (UHG)

Senior UX Designer working with a large U.S. healthcare provider on complex, regulated digital products for medical professionals.

- Conducted stakeholder interviews, documentation analysis, and group usability testing.
- Translated insights into clear onboarding flows and scalable interaction patterns.
- Owned the redesign of major healthcare hubs and landing pages, from structure to interaction patterns, across desktop and mobile experiences.
- Simplified complex workflows and improved usability across mobile and responsive platforms.
- Collaborated closely with product, engineering, and stakeholders to balance user needs, business goals, and regulatory constraints.

Freelance — Senior Product & UX/UI Designer May 2022 — Present
Beett · Third Term · Miller Zell · DMO

Senior Product & UX/UI Designer working with multiple companies across education, healthcare, wellness, and marketing on end-to-end digital products.

- Helped teams document real-world experiences, highlight atmosphere and design details, and inspire others through visual and location-based storytelling.
- Most recently, worked on a content-driven mobile app for marketing professionals, enabling teams to share articles, videos, and location-based recommendations through an interactive map.
- Designed corporate training experiences, leading the full ideation process from concept definition to storytelling and content structure.
- Created communication bots, user flows, and visual systems to improve digital interactions and overall usability.
- Contributed to health-related products, including a medical app and a migraine-treatment solution for large pharmaceutical companies.
- Supported consumer wellness branding and packaging design, ensuring clarity, consistency, and alignment with brand strategy.

UX/UI Designer May 2022 — June 2024
Galicia Bank

UX/UI Designer within the Payments stream of a large-scale banking app, designing high-impact, transaction-critical experiences in a regulated environment.

- Designed core payment and transaction flows used at scale across both B2C (online banking) and B2B (office banking) products, across native mobile apps, desktop, and responsive web experiences.
- Worked extensively with a design system to deliver both incremental improvements and large-scale redesigns, including a major overhaul of the main user homepage where customers access financial information and execute transactions.
- Designed complex data-heavy dashboards with a strong focus on usability, hierarchy, and clarity of financial information.
- Analyzed user behavior using tools like Hotjar to identify friction points and usability issues.
- Authored UX briefs and mapped user flows to align product goals, user needs, and regulatory constraints.
- Designed end-to-end experiences, from wireframes to high-fidelity interactive prototypes.
- Led the UX design of a new banking product from scratch, including research, proto-persona definition, information architecture, UI design, and usability testing.
- Collaborated closely with product and engineering to ensure usability, consistency, and alignment with business and compliance requirements.

Senior Product Designer February 2021 — January 2022
Carestino

Product Designer focused on adapting and localizing China-manufactured products for multiple Latin American markets, designing user-centered experiences across physical and digital touchpoints in diverse regional contexts.

- Led end-to-end product adaptations across multiple Latin American markets, translating regional needs into usable, localized design solutions.
- Worked across physical products and digital experiences, including feature design, supporting assets, and user-facing materials.
- Collaborated with cross-functional teams to ensure consistency between global product foundations and local market requirements.
- Applied localization-driven design thinking, incorporating cultural context, language nuances, and usage patterns to improve usability and adoption.
- Balanced product consistency with regional customization, ensuring each market version remained coherent while meeting local expectations.
